Abstract

State Department evacuates a number of Americans from the U.S. consulate in Guangzhou, China after they experienced unexplained health issues. A group of U.S. diplomats stationed in China have been brought back to the states after being inflicted by a mystery illness that reportedly resembles the brain injuries previously suffered by staff in Cuba. Heather Nauert, a State Department spokeswoman, said in a statement that the individuals from the U.S. office in Guangzhou were returned home for further evaluation. It was unclear if there was any connection to last year's situation in Cuba where 24 U.S. government employees experienced a range of ailments after hearing an unusual sound.

Keywords: Bio-Acoustic Deterrents; Balance, Brain Injuries; China; Cuba; Carcinogenesis; Ear-Ringing; Headaches; Havana-Case; Loss of Hearing; Nausea; Sonic Weapons; State Department; Secretary of State Mike Pompeo; The U.S. Consulate in Guangzhou

Introduction

The New York Times reported that at least two employees removed from China experienced unusual noises while there. The Times reported that U.S. officials are suspicious that China or Russia may be involved. Secretary of State Mike Pompeo said the precise nature of the injuries suffered has not been determined and promised a "multi-agency response to the unexplained health incidents." Pompeo told the House Foreign Affairs Committee last month that the symptoms being reported in China were „entirely consistent with the medical indications that have taken place to Americans working in Cuba.“ Last October, the State Department ordered non-essential embassy personnel and the families of all staff to leave Havana, arguing the U.S. could not protect them from unexplained illnesses that have harmed at least 24 Americans. Symptoms, sounds and sensations reportedly varied dramatically from person to person. Some have permanent hearing loss or concussions, while others suffered nausea, headaches and ear-ringing. Some were struggling with concentration or common word recall, the Associated Press has reported [1].

Materials and Methods

Exposure to infrasound has been demonstrated to affects recipients with symptoms including fear, sorrow, depression,

anxiety, nausea, chest pressure and hallucination. It can cause objects to move through vibration and the body's internal organs can be affected. The term infrasonic applied to sound refers to sound waves below the frequencies of audible sound. Nominally includes frequencies under 20 Hz. Sources of infrasound in nature includes volcanoes, avalanches, earthquakes and meteorites.

The healthy human ear can hear frequencies ranging from 20 Hz to 20,000Hz. Over time, the hair-like stereocilia may get damaged or broken. If enough of them are damaged, hearing loss results. The high frequency area of the cochlea is often damaged by loud sound. Infrasound is sound which extends below the range of human hearing (from 20 Hz to 0.001 Hz), and it imitates from many natural and man-made sources. For example, some animals, such as whales, elephants and giraffes communicate using infrasound over long distances. Sonic and Ultrasonic Weapons (USW) are weapons of various types that use sound to injure, incapacitate, or kill a target. New personal communications show that infrasound can cause trough vibrations, resonance frequency about 7 Hz with internal organs of humans cause also cancer, such as colorectal cancer, pancreatic cancer, etc. [2-4].

Some of these weapons have been described as sonic bullets, sonic grenades, sonic mines, or sonic cannons. Some USWs make a focused beam of sound or ultrasound, some made an area field of sound. As an example of used sonic weapon we can use The LRAD Sound Cannon as an acoustic weapon and communication device. Developed by the LRAD Corporation to broadcast messages and pain-inducing deterrent tones over long distances. LRAD devices come in various iterations that produce varying degrees of sound.

They can be mounted to a vehicle or handheld.

Protests in Ferguson, Missouri have reached a terrifying fever pitch, and the ludicrously armed Ferguson Police Department is bringing all its crowd-control weapons to bear, tear gas, stun grenades, rubber bullets. One of the most controversial of those is the LRAD Sound Cannon. The device produces a sound that can be directed in a beam up to 30-degrees wide, and the military-grade LRAD 2000X can transmit voice commands at up to 162 dB up to 5.5 miles away. The LRAD Corporation says that anyone within a 100 meters of the device's sound path will experience an extreme pain. The version generally utilized by Police Departments (the LRAD 500X) is designed to communicate at up to 2000 meters during ideal conditions. In a typical outdoor environment, the device can be heard for 650 meters. The 500X is also capable of short bursts of directed sound that cause headaches in anyone within a 300-meter range. Anyone within 15 meters of the device's audio path can experience permanent hearing loss. LRAD claims the device is not a weapon, but a directed-sound communication device.

Results

The U.S. State Department has introduced a gaggle of diplomats home from Guangzhou, China, over worry they had been affected by a mysterious illness that resembles a mind harm and has already affected U.S. group of workers in Cuba, a spokeswoman mentioned. After confirming one executive worker had "suffered a medical incident" in the southern Chinese town, the dept deployed a staff to display screen staff and members of the family at its consulate there, spokeswoman Heather Nauert mentioned in a remark on Wednesday. "As a result of the screening process so far, the department has sent a number of individuals for further evaluation and a comprehensive assessment of their symptoms and findings in the United States," Nauert mentioned [2].

"Medical professionals will continue to conduct full evaluations to determine the cause of the reported symptoms and whether the findings are consistent with those noted in previously affected government personnel or possibly completely unrelated," she mentioned. The New York Times reported that the State Department had evacuated no less than two Americans who fell sick after listening to bizarre noises in China. Chinese Foreign Ministry spokeswoman Hua Chunying mentioned on Thursday that so far as she was once mindful, the federal government had no longer had any formal conversation with U.S. officers on any new circumstances, and that it had investigated an preliminary incident. "At present, there's been no discovery of clues or the reason causing the situation the United States mentioned," Hua instructed an ordinary information briefing in Beijing, including that China secure diplomats in step with global conference. "If there's really a problem then the U.S. side can directly contact

the Chinese side and communicate, and China will continue to conscientiously investigate and coordinate with a responsible attitude," Hua mentioned.

Four American individuals of group of workers on the U.S. consulate in Guangzhou referred Reuters to the Beijing embassy press place of business when requested in regards to the state of affairs. A U.S. executive authentic there reiterated that there have been just one showed case in China, introduced closing month, and the State Department was once providing screening to somebody in the U.S. embassy or consulates in China who asked it. In addition to the Beijing embassy and Guangzhou consulate, the United States operates consulates in the mainland Chinese towns of Chengdu, Shanghai, Shenyang and Wuhan.

Last year, 24 U.S. executive staff and members of the family in Cuba displayed the indicators, which have been very similar to the ones associated with concussion and delicate stressful mind harm, in step with the State Department. The sicknesses a number of the American diplomats stationed in Havana heightened pressure between the previous Cold War foes. Secretary of State Mike Pompeo launched a remark on Tuesday pronouncing the dept established a role power closing month "to direct a multi-agency response to the unexplained health incidents". "The precise nature of the injuries suffered by the affected personnel, and whether a common cause exists for all cases, has not yet been established," Pompeo mentioned. [Source hyperlink](#)

Discussion

The LRAD device has been used on several occasions against activists in the USA. The first documented use was in Pittsburgh during the G20 Summit in 2009. The LRAD infra-sound device has potentially long-term effects, including permanent hearing loss and carcinogenesis. [4] Human discomfort starts when sound hits 120 dB, well below the LRAD's threshold. Permanent hearing loss begins at 130 dB, and if the device is turned up to 140 dB, anyone within its path would not only suffer hearing loss, but also lose their balance, and be unable to move out of the path of the audio [3,4].

LRAD systems are deployed at airports to sonically deter birds from residing in the pats of aircrafts. The bio-acoustic deterrent helps minimize bird strikes. It means that this device is available for military, police, secret services and also for agricultural companies to sonically deter birds, (in Slovakia reportedly suspected: Rudolf Ertinger with AT Dunaj Dubnik, Slovakia, and his assistant Tomas Pinke, their cars: NZ 123 ER, NZ 810 GK, TN 181 EB, NZ 708 FY, NZ 702 EG), etc. From the above information it follows that the similar bio-acoustic deterrents may have been developed also in other countries, first of all in other powers, such as Russia, China, India. Reportedly, above mentioned bio-acoustic deterrents may use also the Russian-Based Organized Crime (RBOC), and also in

different local groups of organized crime in V 4 countries.

As it was published in Western media, Russian ambassadors keep dying in mysterious ways. For example, former Russian ambassador to the United Nations, Vitaly Churkin, who died in February 2017 in New York. The US State Department asked the New York medical examiner's office to not release his autopsy. Reportedly, seven Russian ambassadors have died in mysterious ways over the last two years. What's concerning here is that Russia, according to Richard Walton, Scotland Yard's former counter-terror commander, is skilled in disguising, probably by using biological (including bio-acoustic deterrents) or chemical agents that leave no trace. There are simply a lot of really weird coincidences in our world, Rolf Mowatt-Larsen, an intelligence expert at the Harvard Kennedy School, told to media.

From the official U. S. State Department data is known that already in the year 1978 from the 22 American diplomats working in Moscow had got 18 (!) health problems with their carcinogenesis. This situation has been only worsened further during later decades' development at the field of sonic weapons. Today there are a lot of possibilities for example to use sonic weapons from the space satellites, like is category of Russian ERA-GLONASS satellites, (they can blockade completely the whole electronic system of the terrestrial cars), etc. [5].

I was working at the Embassy of the Slovak Republic to Russia in Moscow during the years 2002-2006 as the First Secretary and have also some similar problems with Sonic Attacks. In December, 2017 I have sent my request to the Ministry of Foreign Affairs of the Slovak Republic (MoFA SR) in Bratislava to make investigation of my case of sonic health problems. The official Human Resources' General Secretary of the MoFA SR Pavol Sýkorčín have sent me several months ago a letter rejecting my request for as minimum financial rehabilitation from suffered damage during my above diplomatic mission in abroad. It can be also understood as a shameful case of Moral Incompetence. Recently I hope that the investigation of the Havana-Case in U. S. State Department will prove my experiences. Especially, the AMA's (The America Medical Association) journal JAMA is by my opinion not the best solution for a new types of Sonic Weapons mechanisms investigation. I am also publishing articles in U. S. scientific journals at the field of Biology during several years and I am convinced that the JAMA is too conservative, old-fashioned, out-dated scientific journal. They have only very limited information about new weapon technologies used recently by military and security forces of the modern states. From this reason I am rejecting the JAMA's conclusions in Havana-Case investigation as not enough qualified!

Today there is ongoing a Secret Sonic Weapons War between big powers, and smaller countries too, first of all at the level of their Military Intelligence, which is one of the leading

cause of the World Cancer Epidemic! [4] The problem is that the victims of these secret operations don't know about the dangers of carcinogenesis caused by above Secret Sonic State"! For this reason, I am convinced, that the topic of sonic weapons caused carcinogenesis is also relevant for bigger interest from the circles of the United Nations and the World Health Organization and other similar international organizations.

The secret use of Sonic Weapons leading to the Carcinogenesis may become a new diagnosis of Diplomatic Disease in abroad, and means used against Oppositional Politicians, Critical Intellectuals, etc. Moreover, Sonic Weapons can be used also for the influencing of the Foreign Policy of States at the international stage. For example, the health problems of the President of the European Commission Mr. Jean-Claude Juncker during the last NATO Summit in Brussels, in July 11.-12., 2018, were probably caused by Sonic Weapons (the body imbalance, etc.). It was maybe done for clear Political Goals of the Disintegration of NATO...I am convinced now that the use of Sonic Weapons will bring a fundamental change in Diplomacy and in the means of International Policy making.

Conclusions

On June 29, the U.S. State Department announced that another six U.S. diplomats or family members had been evacuated from the U.S. Consulate in the southern Chinese city of Guangzhou, after experiencing "abnormal sounds or sensations", and apparently taken for evaluation to the University of Pennsylvania for medical evaluation. This brings the total of such evacuations to eight. The problems in Guangzhou did not occur at the Consulate, but at an apartment tower in the city where a number of consulate employees live. In addition, the U. S. disclosed that one employee from the its consulate in Shanghai and two from the U.S. Embassy in Beijing also had been sent to the U.S. for further medical tests., bringing the overall total of such evacuations from China to 11. These problems in China appear to be similar to the medical problems of at least 26 U.S. diplomats and members of their families in Havana, Cuba [6]. The website for the U.S. Embassy in Beijing China released a statement that on June 28 Secretary of State Mike Pompeo spoke by phone with Chinese State Councilor and Foreign Minister Wang Yi. After sentences about their discussion about their "shared goal of the complete, verifiable, and irreversible denuclearization of the Korean Peninsula," it said they "discussed ongoing cooperation on the recent health related incident in Guangzhou, China."
